Southwest NY Dairy, Livestock and Field Crops Program

A partnership between Cornell University and the CCE Associations in these five counties:  
Allegany, Cattaraugus, Chautauqua, Erie, and Steuben.

## Southwest New York Field Crop Series 2021

Join Field Crops Specialists, Josh Putman, for a virtual webinar series focused on problematic weeds, diseases, and insects of Southwest New York and best management practices.

### REGISTRATION

**Registration Fee: \$45.00**

Your registration fee covers all 3 classes.

*Pre-registration is required!*

**Register online today at:**

<https://tinyurl.com/ycul2s3o>

or

contact Kelly Bourne at:

klb288@cornell.edu / (585) 268-7644 ext. 10.

Webinar links and call-in numbers will be shared the day prior to the presentation by the email you registered with.

DEC credits will be given at the conclusion of each day in the series.

You must be present for the entire session to receive credits for that session.

**3.0 DEC Credits in categories 1a, 10, 21, and 23 have been approved for this series!**

**January 19<sup>th</sup> 11am-12pm:**

**Palmer amaranth and other problematic weeds of SWNY - Best management practices going forward**

We now have the problematic weed, Palmer amaranth, located in SWNY and growers need to know the best management practices for this weed. We will also explore herbicide programs for managing weeds in corn and soybeans as well as discuss new research from Cornell University.

**January 20<sup>th</sup> 11am-12pm:**

**Have you seen this disease? New diseases threaten field crop production in SWNY**

Detailed information around integrated pest management and strategies for controlling these pests in corn and soybean production systems in SWNY; specifically disease control. Several of the surrounding states are noticing the new disease, Tar Spot of Corn, and it is making its way north. Here we will explore management options for ear rots, stalk rots, and other diseases in NY.

**January 21<sup>st</sup> 11am-12pm:**

**The soybean cyst nematode - Robbing U.S. yield since 1954**

It was confirmed in 2020 that Soybean Cyst Nematode has spread to 23 additional counties in NY. SCN is the most destructive pest of soybeans in the US. We will learn about management options for this pest as well as other pests in the state.

The SWNY Dairy, Livestock & Fields Crops Program offers educational programming and research based information to agricultural producers, growers, and agribusinesses. Cornell Cooperative Extension is an employer and education recognized for valuing AA/EEO, Protected Veterans, and Individual with Disabilities and provides equal program and employment opportunities. For accommodations, please contact Kelly Bourne, 585-268-7644 ext. 10 or [klb288@cornell.edu](mailto:klb288@cornell.edu) at least one week prior to the event.
