

2017 Corn Silage Pre-Harvest Meetings

With continued low milk prices, getting the biggest bang for your buck out of your home-grown corn silage can help you get improved performance from your herd while also lowering dependence on purchased feed. Plan to attend one of the following on-farm Corn Silage Pre-Harvest meetings to get up to speed on the latest research-backed strategies you can put to work on your dairy.

We will cover optimum harvest timing, kernel processing scoring, particle size, recent research on fiber digestibility, what effect this year's wet weather will have on fiber digestibility, bunker silo packing and optimal fermentation. We'll also discuss late season leaf diseases that always crop up at the end of the season, weed control, and nitrogen management.

While there is no charge for attending, we ask that you pre-register so we can be ready at each location and can contact you in the unlikely event of cancellation or rescheduling. Deadline to register is the day before each event.

Register by calling CCE Herkimer at (315) 866-7920 **or** emailing herkimer@cornell.edu **or** online at <http://cnydfc.cce.cornell.edu/events.php> **or** fill out the form below and mail to CCE Herkimer.

Each meeting will be from 1:00 - 3:30 PM
