

# 2018 Corn Silage Pre-Harvest Workshops

Corn silage harvest is drawing near. The way corn silage is harvested and stored is a single event that affects your operation for the entire next year. Are you prepared to set your operation up for success? Plan to attend one of the following on-farm Corn Silage Pre-Harvest workshops to hear the latest research-backed strategies you can implement on your dairy this corn silage season.

Speakers and topics include:

**Joe Lawrence** *Dairy Forage Systems Specialist; PRO-DAIRY:* State crop conditions and hybrid considerations; packing and covering of bunkers.

**John Winchell** *Alltech:* Inoculant varieties, function, and application; mycotoxin outlook.

**Margaret Quaassdorff** *NWNY CCE Dairy Management Specialist:* Monitoring incoming corn silage (DM, kernel processing, chop length)

Additionally, learn how each farm's crop team individually prepares for harvest.

We will cover optimum harvest timing, kernel processing score, particle size, bunker silo packing and optimal fermentation, state crop conditions, inoculant choice and application, along with other timely topics.

No registration required.

Date	Time	Location	Address
