

# PRODUCER MEETING SALMONELLA DUBLIN

## Salmonella Dublin

(A real threat to your dairy, veal, or beef operation)

**Dr. Belinda Thompson, Cornell University, College of Veterinarian  
Medicine**

- What is Salmonella Dublin & why is it so devastating to dairy, veal, & beef operations?
- What is the risk to people?
- How does it spread?
- Treatment, prevention, & control strategies.

Dr. Belinda Thompson is an assistant clinical professor at the Cornell Veterinary Medicine – Animal Health Diagnostic Center. She has worked extensively with dairy, beef and veal operations regarding the emergence of Salmonella Dublin in New York State and helped bring the blood/milk ELISA Salmonella Dublin test to Cornell. **Coordinated by: Melanie Hemenway, DVM- NYS Department of Agriculture & Markets**
