CCA & 2.0 DEC Credits
Approved

Speaker Topics:

Foster Farm—Overview of Their No-Till Cropping System

Mr. George Foster, Foster Brother's Farm;
Middlebury, VT

George will share their farm's story of what inspired the change to no-till, as well as challenges and success of adopting no-till in 2012 on their heavy clay soils on their 2200 acre dairy farm.

Soil Compaction

Jodi DeJong-Hughes, Regional Educator in Soils & Water Quality; Professor, University of Minnesota Extension

Jodi's work addresses field research and presentations in tillage systems, soil compaction, soil quality. She will discuss compaction as the silent thief and strategies for avoidance and remediation.

Impacts of Neonics and Nematodes on Corn Insect Management

Janice Degni, Area Extension Field Crop Specialist

Corn rootworm is a major pest of corn that requires management. An increase of resistant insect populations has been demonstrated by major injury to crops from trait protection failures. What's next for management and control?

Corn Diseases— Identification and Options for Management

Dr. Gary Bergstrom, Plant Pathology, Cornell SIPs
An overview of major corn diseases including new and expanding diseases, their biology, management options for control and role of crop protectants

Biochar for NYS Agriculture: an introduction and application to soils

Deborah Aller, Program Coordinator;
New York Soil Health, Cornell

An overview of biochar and its practical applications, role in soil health, and carbon sequestration will be highlighted.

These meetings have been generously co-sponsored and supported by the Tompkins and Cayuga County Soil and Water Conservation Districts with Grant Funding from NYS Ag Nonpoint Round 26.
