Cornell CALS PRO-DAIRY

Cornell Cooperative Extension

Equipment Maintenance, Operation and Safety Program

www.prodairy.cals.cornell.edu

Do you...

Do you struggle with broken gates, delayed maintenance requests and unsafe driving on your farm? Then come and join us for this *NEW* hands-on program where we will cover the basics of farm equipment maintenance, operation and safety.

Active demonstrations will be used to teach participants skid-steer focused maintenance, operation and safety best practices. Other equipment touched on will include tractor and feeding equipment such as payloaders and mixer wagons. The program will also cover basic roadway safety, common farm accidents and PTO safety.

With thanks to our partners and sponsors

This program is offered in cooperation with the New York Center for Agricultural Medicine and Health (NYCAMH).

Sponsorship is provided by Zoetis.
