

PLANTER CLINIC TUNE UP

Get the Planter Ready —A walk through that reviews recommended settings and adjustments

Photo source: *Illinois farmgirl.wordpress.com*

A review of planter
maintenance,

set up, specs and practices for optimizing results with
plant populations and planter performance-seed
meter calibration, fertilizer placement,
down pressure and more.

Shawn Bossard has extensive experience in the field, literally. His background includes:

- 5 years on a dairy farm operating 2000+ acres with one of the first manure dragline systems in the state,
- 7 years as an Extension Educator promoting no-till and minimum till practices,
- Managed the dairy and field crop production at SUNY Morrisville where he was responsible for the herd of 200 dairy cows and 2000 crop acres. He honed no-till and minimum till systems along with rolling cover crops, and
- Shawn currently manage the agricultural operations of Cornell's Experiment Station, overseeing 9 different farms including the campus greenhouses.
