Raising the Orphan Calf, by Dr. Rosslyn Biggs

Calves abandoned by their dams have dim prospects if left on their own, but your intervention can help! Outlined in this article are tips to help you give these calves the care they need for their best start in life.

Winter Manure Spreading Restrictions

Regulations surrounding winter manure spreading vary greatly by state, so make sure you're up to date on what you're allowed to do in New York.

Are you tube feeding your calf correctly?

Although commonly used in dairy operations, there are details that we need to pay attention to when using an esophageal tube in calves when feeding colostrum or fluids. Check out [this article](#) and the [companion SOPs](#) available in English and Spanish.

CCE List of Active Shearers in NYS and New England Updated for 2023

Looking for someone to shear your sheep, goats, and camelids? This list can help you identify a shearer who will service your area. Many of these folks book several months out, so get on their list early!

New York On-Farm Research Partnership Value of Manure Project

In this project with the Nutrient Management Spear Program, the nitrogen fertilizer replacement value (how much N can we credit to manure?) is evaluated and yield differences as a result of manure application. To learn the requirements for participation and trial setup, [click here](#).

SAVE THE DATE: Bovine Reproduction and Artificial Insemination Training Course

Join us for a two-day workshop with hands-on training in English and Spanish in cooperation with Javier Cheang from Genex Cooperative Inc. **Registrations will be open by February 1st and space is limited.** If you have interest in attending, you can contact Camila Lage at 607-422-6788 to RSVP.
