## 07.13.2023 Updates from Cornell Cooperative Extension's SWNY Dairy, Livestock, and Field Crops Program

A partnership between [Cornell University](#) and the Cornell Cooperative Extension Associations in these five counties: [Allegany](#), [Cattaraugus](#), [Chautauqua](#), [Erie](#), and [Steuben](#).

***Thank you Amelia Parseghian from [NY FarmNet](#), Sherry B. Coventry from [The Evans Agency Insurance](#) and Andy Vosburg from [Progressive Dairy Solutions, Inc.](#) for sponsoring this Weekly Update.***

### **Adding an Insecticide to your Soybean Herbicide Tank Mix**

If you're going to apply herbicides to your soybeans and know that aphids are present, should you add an insecticide to the tank mix? [Check out this article](#) to learn some considerations for making this decision on your farm.

### **Concentrate feeding strategies for maximizing performance in Automated Milking Systems.**

The return of an age-old practice is gaining momentum with the rapid adoption of AMS - feeding part of the ration concentrate during milking. However, questions about how much to provide, the best nutritional composition, and physical form still divide opinions. [Read more](#)

### **Strategic Deworming of the Beef Herd: Continuing the Resistance Fight**

While commercial dewormers are available to assist beef producers with fighting gastrointestinal parasites, resistance is building among populations on many farms. Strategic deworming in addition to pasture rotation is helpful to keep worms susceptible to anthelmintics so that they remain effective.

### **Farm Employer Overtime Tax Credit Survey from NYS Ag & Markets**

Starting in 2024, farms may be eligible for a 118% tax credit for overtime paid to farmworkers. To assist in preparations, they are asking farms to complete [this survey by Friday, July 21<sup>st</sup>](#).
