2024 Updates on XtendiMax, Engenia and Tavium Registrations and Use in Dicamba-Tolerant Soybeans for NY Producers

On February 06, 2024, the U.S. district court in Arizona vacated 2020 registrations of three dicamba containing products (XtendiMax, Engenia and Tavium) for over-the-top (OTT) applications in dicamba-tolerant (Xtend and XtendFlex) soybean. In response to the U.S. district court ruling, the EPA issued an Existing Stock Order on February 14, 2024, that allows limited sale, distribution, and use of these dicamba OTT products that were already in the possession of growers, distributors or in the channels of trade and outside the control of pesticide companies as of February 06, 2024.
