**Cost:** $20/person payable via card on our website

**Register Online:**

- January 12th - [https://swnydlfc.cce.cornell.edu/event.php?id=1417](https://swnydlfc.cce.cornell.edu/event.php?id=1417)
- January 14th - [https://swnydlfc.cce.cornell.edu/event.php?id=1420](https://swnydlfc.cce.cornell.edu/event.php?id=1420)

**Questions?**

Contact Josh Putman at:
716-490-5572 or jap473@cornell.edu

A confirmation email will be sent the day before the training with information for accessing the virtual classroom.

This event will be offered via ZOOM video conferencing software. Participants will need to use a computer, tablet, or phone with video and audio capabilities.

**1.75 Pesticide recertification credits in the CORE category pending approval!**

---

**What’s new from the College of Agriculture and Life Sciences at Cornell University?**

Horticulture Weed Scientist, Dr. Lynn Sosnoskie, has been conducting some interesting research over the past few months. Extension specialists from all around the state collected and submitted weed specimens for herbicide-resistance testing to better understand the best management practices for these weeds in field crops. Such species included marestail, Powell amaranth, waterhemp, and Palmer amaranth. In addition, Dr. Sosnoskie is working closely with Dr. Yu Jiang to develop a pocket Pigweed ID guide for growers. They are taking 3D images of the weeds at seedling stage all the way to flowering (images below). This information and these tools will help growers maintain crop yields and apply the right herbicide chemistries to their fields.
